NEWSPAPER CHIEF GIRL TRAGEDY

FACE OF DEAD GIRL CLEARED

WORCESTER, March 22.—The police today began a search for a secret sweetheart of Olive Shurtliff, the girl whose death in the massage parlors of Mrs. Georgianna La Roche first revealed the fact that she was facing disgrace.

After questioning Joseph F. Courtmanche, the young man whom Miss Shurtliff was to have married in June, the police eliminated him from the case. Mrs. La Roche has likewise been eliminated. The police feel that neither knew anything of the girl's condition.

Chief George H. Hill, who with others questioned Courtmanche for an hour and a half, said afterward: "We are convinced the young man is not responsible for the girl's condition."

READ REMOVED GIRL.

It is learned that Courtmanche told the police he had recently chided the girl more than once for going to dances and elsewhere with an older man.

Four detectives were dispatched from the police station, after Courtmanche had gone, to find this man and question him.

So far as has been learned, Miss Shurtliff confided only in her mother.

The search for a man who, the police believe, won the girl's affections away from Courtmanche was prosecuted very quietly today. There were rumors, reports, rumors, that the name of a prominent Worcester citizen might be involved. The police believe the girl's silence was the result of her desire to shield this man.

Captain Patrick O'Day of the detective bureau questioned Courtmanche and Mrs. La Roche today. Afterward he made this statement: "Courtmanche told me he knew nothing about Miss Shurtliff's condition and that it was a big surprise to him. He talked very sincerely. They were to be married in June. He had wanted her to marry him before this, but her mother objected."

One Spanish War Tax Proves Illegal

WASHINGTON, March 22.—That action of the Spanish-American war revenue act of 1898 which levied a tax on "charter parties" was declared unconstitutional by the United States Supreme Court today. The act had been challenged on the theory that it was an export tax and as such was unconstitutional.

HAD TO SHOOT TO HALT GERMAN SHIP

WASHINGTON, March 22.—Lieutenant-Colonel Benham, commander of the Porto Rican regiment, in a dispatch to the War Department today officially confirmed reports from San Juan that the German steamer Odenwald was stopped by warning shots fired across her bow when she attempted to leave the port without proper clearance papers. His dispatch reads: "Hullington American commercial steamer Odenwald attempted to leave this port about 3 o'clock this afternoon (Sunday) without clearance papers. At request of Collector of Customs to prevent departure and in compliance with instructions of your telegram of March 15, warning shots were fired with machine gun and one shot from 12 inch howitzer. Two inch rifle from 12 inch ship then came to anchor under 22 March. None were injured. Ship returned to anchorage in harbor. In presence of Collector of Customs on March 15, I personally informed and warned the German consul and the commander of the Odenwald that clearance would be refused if necessary to prevent the vessel leaving without clearance."

THE TRUTH ABOUT THE WAR!

Told in an Uncensored
Talk of 7,000 Words by
Capt. Granville Fortescue
United States Military Aide
at the White House in President Roosevelt's Term.
Now War Correspondent of the
Boston American.

Captain Fortescue has just returned from the front in Poland after seven months' hard campaigning with the armies of England, France, Belgium, Germany and Russia. What everybody wants to know about the war told by an expert military observer and a great war correspondent. How the armies compare. How the officers compare. How long will the war last? Where will the decisive battle be? Where will it be fought? How can Germany stop the Russians in Poland? Who is the greatest commanding general? Which army is the most temperate? What have the actual losses been on each side? How many are fatally wounded, how many recovered, how many are prisoners? The Zepplins raid on London as soon as good weather permits. IN TOMORROW'S BOSTON AMERICAN.

GERMANS RETAKE CITY OF MEMEL

BERLIN, March 22 (By Wire)—The city of Memel, the German seaport on the Baltic occupied by the Russians last Thursday, was recaptured by German troops according to an official report from the German High Command here this afternoon. There was sharp fighting in the streets of Memel before the town was recaptured. The general staff report states that private property was looted by the Russians. The official report also announces recapture of Russian attacks at various points in the eastern theatre, and of French attacks in Flanders, Champagne and Alsace. The official report follows:

"Eastern Theatre.—The Russians were driven from Memel yesterday after a short engagement south of the town and stubborn fighting in the town. Russian attacks made during the day and night broke down under the German fire. Four hundred and twenty Russian were captured. Western Theatre.—A French attempt to take the German position on the south slope of Loreste Heights during the night resulted in failure. In Champagne, north of Le Mans, a French night attack also failed."

TODAY'S MARKET SUMMARY.

Stocks ranged higher at the opening both in Boston and New York. There was a better tone to copper shares here. In New York interest was greatest in industrials. When Bethlehem Steel sold at 49 1/2 it had touched a new high record. American was up 1/2 at 27 1/2. In New York, Bethlehem Steel was up 1/2 at 47 1/2. Steel was up 1/2 at 37 1/2. Aluminum was up 1/2 at 27 1/2. American Gas was up 1/2 at 27 1/2. American Oil was up 1/2 at 27 1/2. American Sugar was up 1/2 at 27 1/2. American Tobacco was up 1/2 at 27 1/2. American Cotton was up 1/2 at 27 1/2. American Wool was up 1/2 at 27 1/2. American Lumber was up 1/2 at 27 1/2. American Paper was up 1/2 at 27 1/2. American Rubber was up 1/2 at 27 1/2. American Glass was up 1/2 at 27 1/2. American Iron was up 1/2 at 27 1/2. American Steel was up 1/2 at 27 1/2. American Copper was up 1/2 at 27 1/2. American Lead was up 1/2 at 27 1/2. American Zinc was up 1/2 at 27 1/2. American Tin was up 1/2 at 27 1/2. American Silver was up 1/2 at 27 1/2. American Gold was up 1/2 at 27 1/2. American Platinum was up 1/2 at 27 1/2. American Palladium was up 1/2 at 27 1/2. American Iridium was up 1/2 at 27 1/2. American Rhodium was up 1/2 at 27 1/2. American Osmium was up 1/2 at 27 1/2. American Selenium was up 1/2 at 27 1/2. American Tellurium was up 1/2 at 27 1/2. American Bismuth was up 1/2 at 27 1/2. American Antimony was up 1/2 at 27 1/2. American Arsenic was up 1/2 at 27 1/2. American Vanadium was up 1/2 at 27 1/2. American Manganese was up 1/2 at 27 1/2. American Cobalt was up 1/2 at 27 1/2. American Nickel was up 1/2 at 27 1/2. American Molybdenum was up 1/2 at 27 1/2. American Tungsten was up 1/2 at 27 1/2. American Uranium was up 1/2 at 27 1/2. American Thorium was up 1/2 at 27 1/2. American Radium was up 1/2 at 27 1/2. American Polonium was up 1/2 at 27 1/2. American Astatine was up 1/2 at 27 1/2. American Francium was up 1/2 at 27 1/2. American Actinium was up 1/2 at 27 1/2. American Protactinium was up 1/2 at 27 1/2. American Neptunium was up 1/2 at 27 1/2. American Plutonium was up 1/2 at 27 1/2. American Americium was up 1/2 at 27 1/2. American Curium was up 1/2 at 27 1/2. American Berkelium was up 1/2 at 27 1/2. American Californium was up 1/2 at 27 1/2. American Einsteinium was up 1/2 at 27 1/2. American Fermium was up 1/2 at 27 1/2. American Mendelevium was up 1/2 at 27 1/2. American Nobelium was up 1/2 at 27 1/2. American Lawrencium was up 1/2 at 27 1/2. American Rutherfordium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. American Seaborgium was up 1/2 at 27 1/2. American Bohrium was up 1/2 at 27 1/2. American Hassium was up 1/2 at 27 1/2. American Meitnerium was up 1/2 at 27 1/2. American Darmstadtium was up 1/2 at 27 1/2. American Roentgenium was up 1/2 at 27 1/2. American Copernicium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. American Seaborgium was up 1/2 at 27 1/2. American Bohrium was up 1/2 at 27 1/2. American Hassium was up 1/2 at 27 1/2. American Meitnerium was up 1/2 at 27 1/2. American Darmstadtium was up 1/2 at 27 1/2. American Roentgenium was up 1/2 at 27 1/2. American Copernicium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. American Seaborgium was up 1/2 at 27 1/2. American Bohrium was up 1/2 at 27 1/2. American Hassium was up 1/2 at 27 1/2. American Meitnerium was up 1/2 at 27 1/2. American Darmstadtium was up 1/2 at 27 1/2. American Roentgenium was up 1/2 at 27 1/2. American Copernicium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. American Seaborgium was up 1/2 at 27 1/2. American Bohrium was up 1/2 at 27 1/2. American Hassium was up 1/2 at 27 1/2. American Meitnerium was up 1/2 at 27 1/2. American Darmstadtium was up 1/2 at 27 1/2. American Roentgenium was up 1/2 at 27 1/2. American Copernicium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. American Seaborgium was up 1/2 at 27 1/2. American Bohrium was up 1/2 at 27 1/2. American Hassium was up 1/2 at 27 1/2. American Meitnerium was up 1/2 at 27 1/2. American Darmstadtium was up 1/2 at 27 1/2. American Roentgenium was up 1/2 at 27 1/2. American Copernicium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. American Seaborgium was up 1/2 at 27 1/2. American Bohrium was up 1/2 at 27 1/2. American Hassium was up 1/2 at 27 1/2. American Meitnerium was up 1/2 at 27 1/2. American Darmstadtium was up 1/2 at 27 1/2. American Roentgenium was up 1/2 at 27 1/2. American Copernicium was up 1/2 at 27 1/2. American Dubnium was up 1/2 at 27 1/2. GALICIAN STRONGHOLD FALLS

Przemysl Surrenders to Russians After Terrific Siege of Many Months.

Continued from First Page.

No estimate of the Russian losses has been given.

The fall of Przemysl means probably the end of Russian troops and a great quantity of artillery for the operations in Western Galicia.

Przemysl has an area of 100 square miles and is one of the most important cities in the Russian empire.

Przemysl has been a constant menace to the Russian position at Tarnopol, owing to the possibility of the city being relieved by an Austrian army from the south.

PRIME FROM EMPEROR.

On January 1, Emperor Francis sent by special courier the following message of congratulation to the Russian government:

"The great and glorious victory of Przemysl is a brilliant and glorious achievement of the Russian arms. The Russian people are proud of the heroism of their soldiers and officers. The Russian people are proud of the heroism of their soldiers and officers. The Russian people are proud of the heroism of their soldiers and officers."

HALF PRICE

Sale of Model Clothes for Men and Young Men

NOW ON—ENDS NEXT SAT. NIGHT

5 More Selling Days Only

If there were companies to insure the success of a business, one of the first clauses they would write in their policies would be this—

"The merchant must clear his stock at the end of each season irrespective of temporary loss to his business or this insurance is cancelled."

No rule is followed more closely in every one of GEORGES six big stores than that of never carrying goods from one season into the next.

Therefore, we inaugurate this eagerly-looked-for final clearance for one week only! A quick, legitimate 50% reduction on all fancy Sack Suits (staple blues and blacks included), many adapted for late Spring wear; Dress and Tuxedo Suits, Walking Suits and Prince Alberts, heavyweight Overcoats, Fur Coats, Top Coats, Mackinaws, etc.

MONDAY, MARCH 22

Nellie Bly's Vivid Word Picture of the Fallen City

The AMERICAN was fortunate in having a representative at Przemysl in the early days of the siege—Nellie Bly, probably the most famous woman correspondent in the world.

Nellie Bly's dispatches to the AMERICAN told vivid details of the siege, the heroism of the Russian soldiers, and the suffering of the civilian population.

Nellie Bly's dispatches were so vivid and so true that they were read by millions of people all over the world.

BY NELLIE BLY.

PRZEMYSL, Poland, Oct. 20, 1914.—I went on the first line to Przemysl. It was Thursday, October 23, 1914.

The city of Przemysl is a beautiful city, situated on the banks of the San River. It is a city of 100,000 people, and it is one of the most important cities in the Russian empire.

SOCIAL TEA BISCUIT

For porch or lawn, picnic or party, luncheon, dinner, tea or dessert, Social Tea Biscuit is equally good and always appropriate. A delicious morsel to refresh one in the hot summer afternoons and evenings.

REICH BATTLESHIP REPORTS SUNK OFF TENEDOS

LONDON, March 22.—An official statement issued by the Turkish War Office at Constantinople today claims that the French battleship *Gaulois* sank off Tenedos as a result of damage suffered in the attack on the Dardanelles on the night of March 18-19.

The statement, which is the first official report of the sinking of the *Gaulois*, says that the ship was hit by a Turkish torpedo on the night of March 18-19.

TWO BOMBERS HIT ROULET.

The Turkish official report adds: "Observations made during the battle on the Dardanelles on the night of March 18-19, showed that the French battleship *Roulet* was struck by two heavy bombs on the night of March 18-19.

ITALY PLANS ATTACKS BY SEA

ROME, March 22.—Attacks by land and sea will herald Italy's entrance into the war if this country joins the Allies, according to a statement issued by the Italian War Office today.

GERMANS RESUME BOMBARDMENT OF CITY OF RHEIMS

PARIS, March 22.—Reports of trenches lost by the French troops in the region of Arras is announced in the German official communiqué from the French War Office.

GERMANS ADVANCE IN ANOTHER GREAT BATTLE IN POLAND

PETROGRAD, March 22.—Another great battle has opened in Poland on the front extending from Minsk to Krasnoyarsk, according to reports received here today.

Russians Announce Defeat of Turks

PETROGRAD, March 22.—Defeat of the Turks in the Caucasus is announced by the Russian War Office today.

SPY AT THE SUBMARINE

A Milan dispatch today to the French Echo states that commerce between Italy and Dalmatia has been suspended and that the commander of the Italian fleet has announced that he will seize ships of any nationality the Adriatic which may be carrying goods to Austria.

2 DEAD, 1 DYING IN MOTOR CRASHES

Two persons are dead and another is dying and five persons are suffering injuries as the result of motorcycle and auto accidents.

William J. Sweeney, 34, of Malden, was killed in a motorcycle crash on the crest of Whittier Hill, at West Newbury, crashed into a telephone pole.

The two men, with Sweeney's wife and Ellen Watson of Forest street, Malden, following them on a second motorcycle, were returning from a visit in Portsmouth, N. H.

Charles Pashley of Waterville and Joseph Leon Hays of East street, Wrentham, were killed when their auto overturned on the South Abington road near Gardner.

Walter Fisher, Charles brother, suffered a compound fracture of the left leg when he was struck by a car on the crest of Whittier Hill, at West Newbury, crashed into a telephone pole.

His wife, Mary, thirty-six, of 64 Bremen street, East Boston, suffered a compound fracture of her right leg when she was struck by the automobile of Acting District Chief John Lannery at Maverick and Meridian street, East Boston.

KEEP LOOKING YOUNG

It's Easy—If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to keep young—no to this you must watch your liver and bowels—there is no need of a medicine—complexion—dark rings under your eyes—simply take a little food in your face—small eyes with no wrinkles. Your doctor will tell you that 90 per cent of all sickness comes from a clogged liver and bowels.

Dr. Edwards' well-known physical in China, perfected a vegetable compound mixed with olive oil to get on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, which are pure, are gentle in their action, yet are effective in their results. They are gentle in their action, yet are effective in their results.

You will know Dr. Edwards' Olive Tablets by their olive color. Do not be misled by cheap imitations. The per box. All druggists.

The Olive Tablet Company, Columbus, O., advertisement.

ROBS BLIND MAN WHO HAD FEED HIM

The Lynn police are today searching for a colored man who robbed Frank Paine, thirty, a blind pianist, of \$1.68 from Grove street, Boston, after he had bought the man a meal.

After leaving the lunch room Paine was pulled into a dark alley by the robber, and he was taken to the ground. His money except a nickel was taken from him.

The robbery was seen by Lucy 25, Metro, six, of No. 24 Pleasant street, Lynn, who led the blind man to the police station. Paine said he was escorted by a man who declared he had been sitting in jail for two days and begged for some money. Paine told the man he was hungry himself and would take him to lunch. They went to a dinner table in Sumner street, where Paine ordered a meal that cost 68 cents.

Paine said he gave the waiter a 10-cent piece and received 18 in change. He then thanked him and started with him to his car. At the corner of Sumner street the man took his money and fled.

Sunday Takes Away \$51,136.85 When He Leaves Philadelphia

PHILADELPHIA, March 22—Billy Sunday passed out of Philadelphia, and out of its heart and its mind. With his wife and family he took a train for Harrisburg, leaving behind him more than \$50,000 in "real estate."

In his wallet he carried a certified check for \$11,135, given in New York for offerings as a grateful testimonial of the appreciation of his efforts in the eleven weeks he was here.

The Broad Street Station a crowd of thousands gathered to bid good-bye to the evangelist. More than 2,000,000 people came to his home in this city.

PHILADELPHIA, March 22—Billy Sunday passed out of Philadelphia, and out of its heart and its mind. With his wife and family he took a train for Harrisburg, leaving behind him more than \$50,000 in "real estate."

In his wallet he carried a certified check for \$11,135, given in New York for offerings as a grateful testimonial of the appreciation of his efforts in the eleven weeks he was here.

The Broad Street Station a crowd of thousands gathered to bid good-bye to the evangelist. More than 2,000,000 people came to his home in this city.

2 CHILD OPEN WUNT SAUGUS FIRE

A little baby was burned fatally today and a five-year-old girl, possibly hurt, in a fire at the home of Mrs. John Craig, 100, in the Back Bay.

The fire broke out at 10:30 p. m. when the mother was alone. The father, however, failed to leave the house, and the mother was taken to the hospital.

The mother was taken to the hospital, and the father was taken to the hospital. The mother was taken to the hospital, and the father was taken to the hospital.

John Craig Plans \$500,000 Playhouse in the Back Bay

John Craig plans to open, by the middle of next fall, a six-story playhouse, to be known as the Craig Theatre, at the upper end of Boylston street, corner of Beacon, at the edge of the Back Bay. Then Mr. Craig and his company will get ready to receive the public.

There will be only one balcony, but the house will have a seating capacity of about 2,000. Mr. Craig is planning to have a building, or, at least, a stage, so that one may sit and watch another in the privacy of the audience. The present playhouse, which is being built, is to be a permanent structure. The present playhouse, which is being built, is to be a permanent structure.

Trust Company Directors Should Not Be Permitted to Make Secret Profits

If it should be found that by some oversight in the reconditioning of our criminal laws the statute punishing embezzlement had been omitted, what would the people say if trustees and bank employees and directors of our trust companies had appeared before the legislative committee to oppose the re-enactment of the law making embezzlement a crime?

Now there is absolutely no difference from the point of view of good morals, common honesty and sound business principles between embezzlement and using other people's money to make a profit to the disadvantage both of the community which does business with you and of your stockholders and depositors whose money you are using.

For many years it was not a crime for a trustee to embezzle money which did not belong to him. The law in its technical development failed to punish people who stole money legally deposited in their care. This omission was partially corrected by the statute law and the men occupying positions of trust were allowed by the criminal law to make secret profits out of their trust money to the harm of everybody else and in fraud of the people whose money they are using. The only remedy which the people whose defrauded had was to recover back the money in a CIVIL suit. The evil of this practice became so notorious in the case of the insurance companies that laws prohibiting the managers of the insurance companies from making personal profits out of the investment of the capital of these companies were passed and is now in force. Our national government has also prohibited the same kind of impropriety and dishonesty in the managers of the national banks.

The bill now pending in our Massachusetts Legislature, introduced by Congressman Tinkham, prohibits directors of our Massachusetts trust companies from doing that which the directors of the national banks are prohibited from doing by the national law and the directors of the insurance companies are prohibited from doing by the laws of those States which have jurisdiction over them.

If the Mayor of Boston, or the treasurer of Boston, or the treasurer of the Commonwealth, or the Governor of the Commonwealth should make a private profit out of a transaction in which they represented the State and used the State's money, they would be committing a crime punishable by imprisonment. But the moral obliquity of such a transaction is no greater than the dishonesty of directors who enter into deals with the money of their stockholders and depositors by which they make a secret profit. The harm that is done by this species of graft is even greater than the harm which could be done by the grafting Mayor or Governor or public treasurer, because the transactions themselves are infinitely more numerous in the banks and more difficult to discover. This evil practice not only robs the stockholders of the bank by depriving them of a profit which belongs to them, but it works harm to the business community. An honest borrower is put at a disadvantage with a man who is willing to pay for his loan, on the side, to one of the directors who secures it for him. In our modern business world credit is almost as essential to the transaction of business as machinery or labor. Anything which makes it hard for honest business to get proper credit, makes it harder to do business, and is a brake on legitimate business.

It is difficult to understand what legitimate argument any self-respecting man can make against this Tinkham bill. The Democratic party in its platform, and Governor Walsh in two inaugural addresses, have urged this reform in the name of common honesty and sound business principles. Therefore, if there are any number of uncontrolled Republicans in the Legislature, the Tinkham bill will be enacted.

Poets, Artists, Authors, Musicians and Statesmen Combine to Help Belgium

Copyright, 1915, by the Book Concern.

Every age has its scoffers—its self-constituted wise men who preach about the retrogression of civilization and the growing selfishness of humanity. But as surely as every age produces its own scoffers as surely does every age produce its own answer to them.

Whenever we begin to think that humanity is becoming too callous, too self-centered, there always comes something—the distress of Belgium, for example—which furnishes humanity an opportunity to show its best side, and it always responds as wholeheartedly and unselfishly as it has responded to the needs of this little country that "has kept the pledge and died for it."

Millions have poured into the Belgian relief fund through a multitude of committees so organized as to represent every class, and money will continue to pour in until Belgium is restored.

All of these efforts merit the highest praise, but one that deserves special mention, is that it is worthy and, being new, has not received much attention, is the band of 250 authors, artists, statesmen and composers who, under the leadership of Hall Caine, are doing this thing.

There is a big and beautiful idea behind the effort of these men. They have produced a permanent memorial—in the form of a book—to Belgium's heroism which every one can buy, and in doing so contribute to the relief of the stricken people, for the entire profit from sales are to be devoted to that purpose.

And besides contributing to the material side these 250 men, whose names are household words, through the prose, the poems, the pictures and the songs and music which they contributed to "King Albert's Book," offer comfort and solace to the souls of these stricken people. As long as the world is animated by such a spirit it will be a good world. There will be no room in it for the pessimistic critic of humanity.

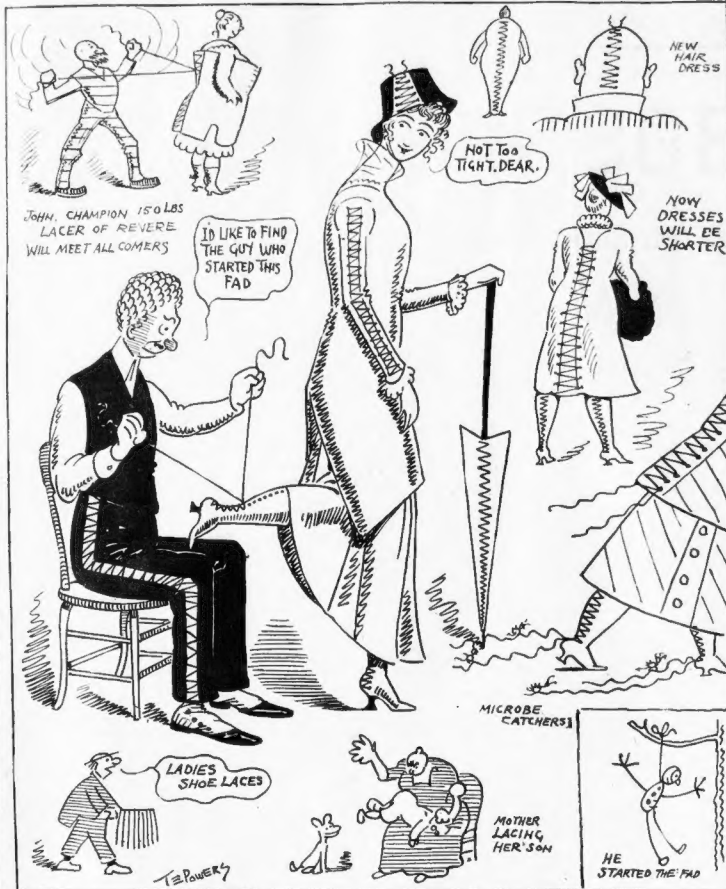

"King Albert's Book," aside from sentimental interest, is worth having for its own sake. It is a large, handsome volume, and contains more contributions from illustrious contributors than have ever before appeared together in one volume.

Great Mysteries of Nature and Science

How Gravitation Plays with Cannon Balls and, in League with the Atmosphere, Makes Hard Ciphering for Artillerists with Long-Range Guns

By GARRETT P. SERVISS

"C"OULD you answer the following question?—If a cannon aimed straight up at the sky in the air, and the ball after reaching its limit range starts down a straight line to the muzzle of the gun, will the ball enter the gun muzzle with the same velocity as it had when it left the gun? Of twenty-five men, two say the velocity is the same; twenty-three say they would rather catch the ball coming back than going out. P. T.

If there were no resistance of the air the velocity of the ball on its return would be precisely the same as at its start, but air resistance would slow its motion during both the ascent and the descent. This resistance has to be allowed for in determining the range of all projectiles, and the astonishing accuracy with which huge shells can be dropped on a ship, or inside a fortification, at distances of many miles, shows

how carefully the formulas needed for calculating the flight of bodies through the air and in opposition to the force of gravity have been prepared.

As far as the effect of gravity is concerned such calculations are very simple, but the amount of the air resistance varies with the velocity, the shape and size of the projectile, the state of the barometer, or the atmospheric pressure, the height of the flight, the direction of the wind, and other variable circumstances. Generally speaking, it may be said that the resistance is proportional to the square of the velocity, but it cannot be accurately determined by any mathematical rule.

Leaving the air resistance out of account, the vertical flight of a cannon ball and its subsequent fall back again to its starting point would be performed in exactly the same time and at the same velocity. The earth's attraction, of gravity, exerts a retarding effect upon any body ascending vertically, which amounts

to a loss of about thirty-two feet per second in the body's velocity. The height to which the body will go is equal to the square of the velocity with which it starts divided by twice the retardation per second.

Suppose your cannon sent its ball from the muzzle at 3,000 feet per second; then it would, neglecting air resistance, rise to a height of $3,000 \times 3,000$, divided by 64, which equals 140,625 feet, or more than 26½ miles. When it reached that height, which it would do in about 30 seconds, its acceleration force would have been entirely overcome by the constant backward pull of gravity, and, after pausing an imperceptible moment, it would begin to fall back, its velocity increasing at the same rate which it had decreased during its ascent, and when it again reached its starting point it would have the precise velocity of 3,000 feet per second with which it set out. This calculation uses round numbers, and neglects the slight diminution of the force of gravity that would be experienced at a height of 26 miles.

But the ball would not fall directly into the muzzle of the gun because, in consequence of the rotation of the earth on its axis, the returning ball would describe slightly toward the west from its starting point. This deviation is another thing which artillerists have to allow for in calculating the flight of projectiles fired to great distances. It is due to the fact that as a projectile has ascended to a considerable height above the earth it is in a region

where the easterly motion required to keep the ball vertically over its starting point is more rapid than that which the ball had on leaving the surface. It cannot gain the needed increase of rotational velocity, and when it gets back to the point on the surface from which it started has advanced slightly eastward, or the ball has fallen back westward.

The same principle affects bodies which fall from a fixed point, but in this case the deviation is eastward, because now the body has, to start with, a rotational (eastward) velocity greater, because of greater distance from the earth's center, than that belonging to points beneath it. Many most interesting experiments have been performed to obtain actual measurements of the eastward deviation of bodies falling from a height. High towers and deep mines have been used as the scenes of the experiment and the theoretical law has often been indicated by the results obtained.

This deviation would affect the motion of a body falling in a tube passing through the center of the earth, unless the tube followed the line of the earth's axis. In a recent article replying to a question regarding the fall of a body inside the earth, I purposely omitted this element of variation, in order not to complicate the answer too much, but a correspondent immediately pointed out the omission to me, which shows that many good heads besides those of "R. T. V." "bench of mechanics" like to exercise their powers interrogating Mother Nature.

Ella Wheeler Wilcox Writes on the Tests of Real Friendship

Some of the Virtues Which Differentiate the True from the False Friend

By Ella Wheeler Wilcox

Copyright, 1915, by the Book Concern.

Real friendship results in a sense of freedom in association, but it does not permit of license. No friend can be so intimate that the need of delicacy does not exist. One can never be so sure of a friend that unnecessary and uncalled-for freedom of speech is permissible.

My true friend never comes to me with the belittling and careless gossip which he hears about me. He never says, "I know you will not care," and then relates some vicious lie invented by the mind of envy. He never tells me anything disagreeable unless it is to warn me or put me on my guard against a serious enemy or against my own imprudence. He tells me the kind and pleasant words he hears about me and takes as much pleasure in hearing them as I do. And he does not let me in my absence even against an army of accusers.

He will say things to my face which he would not say or permit to be said behind my back. Friendship of the highest order should banish all wearisome restrictions and formalities. If I happen to drop in on my nearest friend as he is preparing to go out with another, she should feel free to go with no fear that I will be hurt or feel slighted. The moment this fear of wounding our friends in such matters creeps in it is no longer or not yet an absolute friendship.

We can bear with the "crannings" of snafes, fears and turnouts of love, but the calmer pleasures of friendship are jeopardized if we permit these other emotions to mar them.

Love is like the tidal-ocean, grand, beautiful and terrible, full of delight and danger, and friendship should be like the calm bay where one rests, and do not fear; it cannot give us the exhilaration of love and it must not give us the anxieties.

We feel rested and strengthened after an interview with a real

friend, never irritated or worried. The worthy and worth-while friend never chides us for not loving him enough nor begs to be loved more; he makes himself as desirous and so unobtrusive that we need not give him gratitude and affection.

The wise friend never weighs in with friendship—never burdens us with feelings that he cannot live without our constant devotion. It is the privilege of love alone to do that.

Love may learn and cling forever. And forever grows more dear.

But friendship must sometimes stand upon its own feet or we fly off it.

If my friendship is absolute, I will stand by my friend in trouble, danger and disgrace—not upbraid him in the latter, but holding him from sinking lower. If he resents my restraint, however, and is determined to sink, I do not prove my friendship by sticking with him. I only prove my own moral weakness. Better let go! hold on! save my strength to assist another who wants my help. If he will not heed my advice or counsel, but insists upon associations and actions which injure him, I only blacken my own record and weaken my power to aid others if I stand by him. Friendship to one's higher self should not be sacrificed in a mistaken sense of devotion to another. Neither should I ask my friend to go down into the valley of despair with me—he will be a true friend if he stands above in the sunlight and strives to lift me up beside him.

I do not want my friend to constantly urge me to accept favors, but when, in my hour of need, I ask a favor, I want him to grant it with the air of one who is the recipient rather than the giver. Neither do I want him to render favors on the ground of being ungrateful to repay me, since real friendship finds payments in the bestowing of favors. And always I want him loyal, trusting and sincere in word and act; as liberal as loving, as free from jealousy as he is full of justice, ready to praise and not afraid to reprove.

More Truth Than Poetry

By JAMES J. MONTAGUE

The Road to Happiness

A Dutchess County Judge says that the married man who permits his wife to throw frying pans at him is sure to be happy in the end.

If the partner of your earthly joys and sorrows—When she doesn't quite approve of what you do—is disposed to buff and bat you or to hurl the skillet at you, Or to take a carving knife and run you through, You must treat her with affectionate indulgence; Non-resistance is the very safest course. If you seek to curb her fury she will go before a jury And she'll stick you for the price of a divorce.

THOUGH it sometimes modifies the quiet pleasure That a married man expects to find at home, To be walloped with a kettle made of hard, unyielding metal On the unprotected portions of his dome; Still, the court declares, it's better to endure it With no evidence of peevishness or pique, And with no rough conversation, lest she get a separation And three-quarters of your wages every week!

FOR the temperament of ladies is peculiar; They believe that they can cure their husband's faults, Not with disapproving silence, but with language-laden violence And with well-intentioned punitive assaults. If you interfere with these enlightened methods You will stir your wife to bitterness and wrath, She will quit you if you cut her; but if you sit round and suffer You will find that life is one long pinochle party.

They Wouldn't Attract Any Attention Nor for a Subscription to the Commoner. The White House baby has sent a note to charity. Now that has been discovered that he can write checks he'll be kept busy writing them for Democratic campaign funds.

It May Be a Coincidence, However. The singular fact that Sir Bryn ap Iwan of Billy Sunday's platform the day after it was announced that he had received eighty thousand dollars for his labor there?

Method in It, Maybe. Before we congratulate these heroic British women who refuse to run down coal every time a Zeppelin appears we might accurately observe or not there are mice in the cellar.

Merely Dumb Beasts. Let dogs delight to scrap and snarl, For 'tis their nature; but But they can't do the job up right Like Christian nations!
